GENERAL CATALOGUE
PRODUCT

sprint.family

The most versatile banner display solution

The Sprint is a banner stand with a telescopic pole that ranges from 2 to 5 m.
Several widths and heights are available to display single or double-sided graphics on the same frame, or to use with rigid or flexible substrates.
Hanger & kicker sizes: 600, 800, 1000 and 1200 mm (self-adhesive or clipping)
The Sprint (made for quick set-up applications) has 3 feet linked with bungee cords for a quick, simple and secure automatic set-up.
The sprint.boutique (made for more permanent applications) has a steel disc base which offers maximum stability for high traffic areas and retail displays.

BANNER DISPLAY

sprint.relay

The low-cost backwall solution made by combining Sprint displays

The Sprint.relay creates a seamless graphic backwall at a fraction of the cost of a traditional pop-up display by combining up to 4 sprint displays.

sprint.boutique

The most versatile banner display solution

Especially made for retail & high traffic areas
Scratch resistant base
High-quality POP solution
The Boutique is the permanent version of the Sprint family

sprint.shop

Integrated slatwall panels

The Shop slatwall is locked on the telescopic pole of the Sprint.
Whether hidden behind a graphic panel or left visible, the slatwall system can accommodate a variety of accessories to promote a marketing message or to display products .

- Shelves
- Brochure-Holder
- LCD Screen

The slatwall bracket is standard size to accommodate all slatwall accessories already available on the market

starter.family

The 1st class solution among the low cost banner stands

Starter offers a sturdy, high quality structure made out of anodized aluminum and powder-coated steel at a very competitive price.

Simple construction using tension between the bungee cord and the components means the Starter is very easy to set-up.

BANNER DISPLAY

starter.800

The 1st class solution among the low cost banner stands

Delivered with clipping hanger and kicker, the change of graphic is super easy!

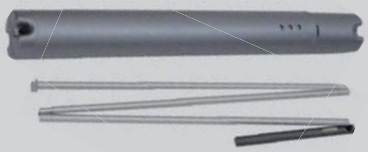
starter.800
Width 800mm Height 2000 mm
starter.1000
Width 1000 mm Height 2000 mm

starter.1000

The 1st class solution among the low cost banner stands

The Starter does not take much space – less than 27,5 cm in depth – which makes it convenient to position the structure in any strategic spot, such as malls, stores, meeting halls.

Plastic tube as a case option



Nothing can be lost. All the pieces are held together with a bungee cord.

set.family

Sleek design, Adjustable height, Retractable

The NEW Set retractable banner system features a twisting and self-locking foot for unmatched stability.

The 3-tier sprint pole adds flexibility in height (from 700 mm to 2100 mm) and ease of use to the duo retractable family. Thanks to a new header, it ensures a firm installation of the graphic and allows you to attach a spotlight.

ROLL-UP BANNER

set.800

Sleek Design, Adjustable height, Retractable

Switching graphics is EASY with the sliding connection on the leader tape (ECI – Easy Change of Image system). Simply pull out and secure with the Allen Key, attach the graphic like a Ziploc bag, and you are ready to go.

NEW

hello.xpress

The All-In-One Exhibit Solution for Xpressions

Xpress is the perfect solution to meet your customers, wherever they are. The case contains two shelves and two 3x1 pop-up displays. The case converts into a podium.
Using the shelves you can link the 2 pop-ups and create a backwall using the Xpressions 3D effect.
The result is a fantastic solution for 9 m2 show space. Many options and configurations are available.

Create a 3x3 backwall with only two 3x1 frames. Simply connect the shelves onto the specific inserts on the frame.

ALL-IN-ONE SOLUTIONS

hello.xpress

Advantages:

Adapt your message to the event.
Less than 10 min to install the solution (equivalent to a 9 m^2 booth)
Can be shipped without airline or shipping companie's large Package Surcharge.

Xpress kit includes the Xpress case, two 3x1 Xpressions frames and 2 vaccum shelves.

xpressions.family

Perspective and creativity

Boost your sales with the most creative display solution!
A creative visual impact in just a few steps.
xpressions offers endless configuration possibilities thanks to 9 different frame shapes and the possibility to attach graphics of all sizes on two levels of depth.
Nothing will restrict your imagination. Display your image and message differently and maximize their impact!
To top it all, the xpressions frame is user-friendly: a very light self-locking frame on which graphics can be changed within seconds.

easy.family

The fabric backwall for display communication!

The fabric backwall for display communication!
The Easy setup is very quick! Less than a minute!
The graphic remains on the frame even when folded.
Ergonomic design, sturdy construction.

The concept of the Easy is very unique.
Without magnets or hooks, the graphic keeps the frame open.

This has 2 advantages:
• The graphic dictates the size and the shape of the frame so its tension is always perfect.
• As there is no hook to remove before folding the frame, there is no risk of damage.

ABOUT **US ?**

Since 1981, ***duo.*** *has been offering visual communication solutions to a network of resellers spread over 50 different countries from their head office in Lansargues (France) and their Chicago and Montreal subsidiaries.*

INNOVATION : WHY AND HOW ?

We innovate in order to respond better to the needs and new demands of our customers by continually striving to develop and improve both our solutions and products.

WHY ?

In order to maintain our competitive advantage through a differenciation strategy.
For us innovation means growth, profitability and long term viability.

HOW ?

Everyone at duo. is encouraged to innovate !
Innovation must be everywhere and at all levels.
More than a methodology it's a mindset.
Innovation is the engine that drives duo.

Keeping up with the latest trends by analysing the needs and new requirements of our customers is our first priority .
The challenge is to harness our resources to translate needs into innovative solutions.

Today the trend is for modular , reusable and interchangeable designs that maximize the use of our products.

Polyvalent products are not only better value for money and a better investment but also have less environmental impact.

Today, it is virtually impossible to conceive a 100% ecological solution or product that does not lose its essence in the process . If such a product exists , it is probably neither a good solution nor a good product .

However, following a thourough study of the environmental impact of our products conducted in 2006, we have made it our daily goal to minimize our environmental impact thoughout our design and production process.

In terms of innovation, we do not see this goal as a hindrance but rather as an opportunity to push the boundaries of the possible.

duo. also offers a range of additional lighting and transport solutions to complement your products.
